Study Information

Hello, welcome, and thank you for your interest in participating in this research study!

In this study, you will see 12 Instagram posts. We will ask you several questions about each of them.

The University [REDACTED] is conducting this project to understand the effects of messages (words and pictures) from social media and commercial sources which you may come across on the internet on your perceptions of the messages themselves and of related behaviors. This is an online survey, which will take place over the Internet. This study takes, on average, 15 minutes. During that time, you will be asked to view multiple messages and provide ratings of your perceptions of these messages and related behaviors and ideas. You will also be asked to provide some information about yourself, such as basic demographic information (for instance, gender and age). **Note that some of the images may be disturbing to some participants (e.g. depicting an accident or a fight). If you would prefer not to see such content, please do not participate in this study.**

Your participation is voluntary which means you can choose whether or not to participate. If you decide to participate or not to participate, there will be no loss of benefits to which you are otherwise entitled. Before you make a decision, you will need to know the possible risks and benefits of being in the study and what you will have to do if you decide to participate. **All this information is provided in this form. Please read it carefully.**

How much will I be paid? Upon completion of all questions in this survey, participants will be paid at a rate of 7.50 Euro/hour. Since your participation will take about 15 minutes, you will receive 2 Euros. To receive this reward, we require that you complete the survey faithfully, follow all study instructions.

For details on how we protect your privacy in this study, your rights as a participant and contact information of the researchers and the responsible ethics committee, please see here:
